CHAPTER 4

IMPLEMENTATION RESULT

4.1 Implementation of the Student Information Center

In our project, there are two operations for student to query what information they want and admin to edit the information to display in webpage. In student information project, user must first see our home page which explains what user can ask in our website and what are the advantages of our website. And then user can choose to register to our website and login to our website if she is already registered. And then ask the query they want to know and can also report for new information. For admin, she can add categories, questions, answers and manage the members of the webpage and handle the user query requests.

4.1.1. Home Page of Student Information Center

Fig 4.1 shows the home page of the Student Information Center, in which user can choose to sign up or register.
